DETAILED ACTION

Election/Restrictions

1. Claims 3-6, 9 and 11-16 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 07/07/05.

2. Applicant's election with traverse of Group III in the reply filed on 07/07/05 is acknowledged. The traversal is on the ground(s) that the search and examination of an entire application can be made without serious burden. This is not found persuasive because the device of Group I will need to be searched in class 83, subclass 452, along with a unique text search. Group II would not be searched as above, but would instead be searched in class 33 accompanied by a different text search, which represent an excessive burden on the office to examine all of these inventions together.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 10 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 3724

5. Claim 10 recites the limitation "the engagement hole". There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Kennedy (3,082,799).

Kennedy discloses (Fig. 1-6) the invention including a paper ruler 11, a surface 13, a cutter 15, a magnet (54 and 35), an attraction and attraction release buttons (47 and 60) and an upper surface 27.

Allowable Subject Matter

8. Claims 2, 7 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Gerber et al., Ruotsalainen, Mathian and Chen are cited to show related device.
